

The Apple Pull Down Menu

The Apple Pull Down menu (often referred to as “the  menu”) is under the multi-colored apple icon in the far upper left hand corner of your Mac’s screen. This menu remains available no matter what application or program you have running.

Items in the  menu are stored in the Apple Menu Items folder nested inside the System Folder on your internal hard drive (or whatever disk you used to start up your Mac.)

Placing an item or an alias of an item in the Apple Menu Items folder causes that item to appear in alphabetical order in the menu that appears when you open the Apple Menu. Selecting an item in the Apple Menu opens that item.

Likewise, if you remove an item from the Apple Menu Items folder it will disappear from the Apple Menu.
